TOP OF TOWER REMAINS

IN TREE BRANCHES Pine Grove Landmark Fell in Peculiar Way.

The position in which the big tower at Pine Grove, known as Burnham's Folly, fell during the gale Sunday afternoon is a peculiar one, and has attracted comment from those who have visited the grove since the storm. The bulk of the 100 foot structure rests on the cottage of Mrs. Annie Bronson, which is crushed in by the great weight. The summit of the tower is held, however, by branches of a big tree, the trunk of which is about two feet in diameter.

The resistance and support furnished by the tree doubtless saved the tower from being broken to fragments. On Wednesday a force of men was at work in an effort to save as much of the lumber from the tower as possible. This will be used in building a store which is to be conducted by George Shefflot. ernoon is a peculiar one, and has at-

But Stuart's Calcium Wafers Will Remaye the Unsightly Blomishes in So Short a Time as to Seem Almost Impossible of Belief.

The crowning beauty of a woman is her skin. She may have only ordinary features or even a coarse, heavy con-tour of face, but if she is the posses-ser of a fine, colorful skin, showing vigorous health and a pure blood, she will grow attractive to every eye.

"Betty has a pretty face and cute dimples, but the pimples ere horrid."

The Man: "Stuart's Calcium Wafers would remove them in a jiffy."

The great trouble with the majority of women is that they try to remove pimples by outside treatment, such as greases, massage, cosmetics, electri-city, etc. These methods will not cure nor even temporarily remove pimples and facial disorders.
